EXPERIENCE

Trimble B2W Software

May 2026 - Present

Software Implementation Consultant

Portsmouth, NH

- Lead end-to-end implementations of enterprise construction estimating software built on Microsoft .NET Framework and SQL Server, translating business requirements into scalable technical solutions through C#, SQL, REST APIs, workflow automation, and system configuration.
- Configure enterprise integrations using REST APIs, AEMP2 telematics, Windows Task Scheduler, and batch scripting for John Deere, Komatsu, and Samsara.
- Analyze SQL Server databases, validate enterprise data, diagnose production issues, and optimize customer workflows for large-scale multi-user software deployments.
- Served as the primary escalation point for enterprise software licensing, activation, and provisioning across the B2W product suite, creating AI-assisted documentation and workflow improvements that streamlined internal support processes.

Technical Support Engineer

Sept. 2025 - May 2026

- Resolved **1,400+ production software issues in six months** involving SQL Server, authentication, licensing, reporting services, cloud infrastructure, and enterprise software integrations.
- Investigated software defects by reproducing issues, analyzing SQL Server data, documenting and tracking defects in Salesforce and JIRA, and collaborating with Development and QA teams to validate software fixes.
- Maintained enterprise software environments by supporting installations, upgrades, IIS, SSRS, database administration, cloud-hosted deployments, and application migrations
- Earned promotion to **Software Implementation Consultant within six months**, recognizing technical performance, customer communication skills, and ability to manage complex product workflows.

Designs By Dart LLC

Jan. 2022 - Present

Web Designer / Owner

Alton, NH

- Designed and maintained custom websites for **20+** small businesses using Wix, WordPress, Shopify, and Square Online.
- Led end-to-end client engagement, including discovery calls, proposals, design execution, and post-launch training.
- One of two approved web development contractors through the NH Small Business Development Center and State of NH.

Account Tree

May 2024 - Aug. 2024

Software Development & Marketing Intern

Dover, NH

- Developed software features by writing BRDs and debugging PHP/JavaScript issues using Agile methodology.
- Rebranded the company with a redesigned website and updated marketing assets.

PiRail (Senior Capstone)

Aug. 2024 - May 2025

Software Engineer

Durham, NH

- Led redevelopment of a legacy interface into a modern React.js, mobile-first application featuring interactive mapping and GPS visualization.
- Collaborated using Git and Agile development practices to design responsive user interfaces and deliver a production-ready application.
